Phonology

Consonants

	Alveolar	Palato-Velar	Uvulo-Glottal
Nasal			$\text{N}^{\text{ʔ}}$ ⟨n⟩
Stop	$\underset{\text{◌}}{\text{d}} \underset{\text{◌}}{\text{t}}$ ⟨d t⟩	$\widehat{\text{c}}\widehat{\text{k}} \widehat{\text{j}}\widehat{\text{g}}$ ⟨c g⟩	ʔ ⟨ʔ⟩
Fricative	$\underset{\text{◌}}{\text{s}} \underset{\text{◌}}{\text{s}}^{\text{h}}$ ⟨s sh⟩	$\underset{\text{◌}}{\text{ç}}\underset{\text{◌}}{\text{x}} \underset{\text{◌}}{\text{ç}}\underset{\text{◌}}{\text{x}}^{\text{h}}$ ⟨ch x⟩	
Affricate	$\widehat{\underset{\text{◌}}{\text{t}}\underset{\text{◌}}{\text{s}}} \widehat{\underset{\text{◌}}{\text{t}}\underset{\text{◌}}{\text{s}}}^{\text{h}}$ ⟨ts tsh⟩	$\widehat{\text{c}}\widehat{\text{k}}\underset{\text{◌}}{\text{ç}}\underset{\text{◌}}{\text{x}} \widehat{\text{c}}\widehat{\text{k}}\underset{\text{◌}}{\text{ç}}\underset{\text{◌}}{\text{x}}^{\text{h}}$ ⟨tch tx⟩	
Trill		$\underset{\text{◌}}{\text{r}}\underset{\text{◌}}{\text{R}}$ ⟨r⟩	

◇ $r / \underset{\text{◌}}{\text{r}}\underset{\text{◌}}{\text{R}} /$ is a coarticulated palatal-velar trill (yes, Elves can do that)

Vowels

	Front	Back
Close	i ɪ ⟨i î⟩	u ʊ ⟨u ú⟩
Open	a ɐ ⟨a á⟩	

◇ Tense/lax distinction. Lax vowels are marked with an acute.

Vowels

	Front	Back
Close	i↓ ɪ↓ ⟨i í⟩	u↓ ʊ↓ ⟨u ú⟩
Open	a↓ ɐ↓ ⟨a á⟩	

- ◇ Tense/lax distinction. Lax vowels are marked with an acute.
- ◇ All vowels are ingressive.

Vowels

	Front	Back	Click
Close	i↓ ɪ↓ ⟨i í⟩	u↓ ʊ↓ ⟨u ú⟩	
Open	a↓ ɶ↓ ⟨a á⟩		
Palato-Velar			kɥ ↓ ⟨o⟩

- ◇ Tense/lax distinction. Lax vowels are marked with an acute.
- ◇ All vowels are ingressive.
- ◇ Ingressive sounds are considered vowels. Thus, the palatal-velar click is a vowel.

Vowels

	Front	Back	Click
Close	i↓ ɪ↓ ⟨i í⟩	u↓ ʊ↓ ⟨u ú⟩	
Open	a↓ ɶ↓ ⟨a á⟩		
Palato-Velar			k̠ ↓ ⟨o⟩

- ◇ Tense/lax distinction. Lax vowels are marked with an acute.
- ◇ All vowels are ingressive.
- ◇ Ingressive sounds are considered vowels. Thus, the palatal-velar click is a vowel.
- ◇ The ogonek signifies the ‘velar quality’, e.g. $\acute{u}$ / $\acute{u}^{\text{fg}}_{\downarrow}$.

Work Order Markers

- ◇ Raising above the maximum / below the minimum is ungrammatical.

Work Order Markers

- ◇ Raising above the maximum / below the minimum is ungrammatical.
- ◇ ‘Lowest’ work order is 11; ‘highest’ is 1.

Work Order Markers

- ◇ Raising above the maximum / below the minimum is ungrammatical.
- ◇ ‘Lowest’ work order is 11; ‘highest’ is 1.
- ◇ E.g. 5 can be ‘raised’ to 4 or ‘lowered’ to 6.

Work Order Markers

- ◇ Raising above the maximum / below the minimum is ungrammatical.
- ◇ ‘Lowest’ work order is 11; ‘highest’ is 1.
- ◇ E.g. 5 can be ‘raised’ to 4 or ‘lowered’ to 6.
- ◇ Lowering can be derogatory and raising a form of praise.

Work Order Markers

- ◇ Raising above the maximum / below the minimum is ungrammatical.
- ◇ ‘Lowest’ work order is 11; ‘highest’ is 1.
- ◇ E.g. 5 can be ‘raised’ to 4 or ‘lowered’ to 6.
- ◇ Lowering can be derogatory and raising a form of praise.
- ◇ Combine with adjective/number to refer to a noun.
E.g. *txúnsha irtótótōn* ‘seven of the thing with work order 6’.

Noun Markers

◇ *tchá* / $\widehat{\text{ck}}\widehat{\text{çx}}\text{e}^{\text{f}\downarrow\text{g}}$ / ‘performs work’ (WRK ‘working’).

Marks the agent of a verb that denotes an action that performs work.

Noun Markers

- ◇ *tchq̃* /*ckçx̃e^{f̃g}↓*/ ‘performs work’ (WRK ‘working’).

Marks the agent of a verb that denotes an action that performs work.

- ◇ *dun* /*ḍu↓N[?]*/ ‘does not perform work’ (NWK ‘not working’).

Marks the agent of a verb that denotes a state or an action that is *not* considered to perform (worthwhile) work.

Noun Markers

- ◇ *tchá* /čkčx^ǵ↓/ ‘performs work’ (WRK ‘working’).

Marks the agent of a verb that denotes an action that performs work.

- ◇ *dun* /d_u↓N^ʔ/ ‘does not perform work’ (NWK ‘not working’).

Marks the agent of a verb that denotes a state or an action that is *not* considered to perform (worthwhile) work.

- ◇ *úrú* /ũ^ǵ↓r_uũ^ǵ↓/ ‘has work performed on it’ (WKD ‘[being] worked [on]’).

Marks the theme of a verb whose agent assumes the WRK form.

Noun Markers

- ◇ *tchá* / $\widehat{ck}\widehat{ç}x^{f\hat{g}}_{\downarrow}$ / ‘performs work’ (WRK ‘working’).

Marks the agent of a verb that denotes an action that performs work.

- ◇ *dun* / $\downarrow u\downarrow n^{?}$ / ‘does not perform work’ (NWK ‘not working’).

Marks the agent of a verb that denotes a state or an action that is *not* considered to perform (worthwhile) work.

- ◇ *úrú* / $\check{u}^{f\hat{g}}_{\downarrow}r\check{u}^{f\hat{g}}_{\downarrow}$ / ‘has work performed on it’ (WKD ‘[being] worked [on]’).

Marks the theme of a verb whose agent assumes the WRK form.

- ◇ *úxí* / $\check{u}^{f\hat{g}}_{\downarrow}\widehat{ç}x^{h,f\hat{g}}_{\downarrow}$ / ‘is being manipulated in some fashion’ (MAN ‘manipulated’).

Marks the theme of a verb whose agent assumes the NWK form.

Noun Markers

- ◇ *tchá* /čkčx^{fg}↓/ ‘performs work’ (WRK ‘working’).

Marks the agent of a verb that denotes an action that performs work.

- ◇ *dun* /d_u↓N[?]/ ‘does not perform work’ (NWK ‘not working’).

Marks the agent of a verb that denotes a state or an action that is *not* considered to perform (worthwhile) work.

- ◇ *úrú* /ŭ^{fg}↓r₊ŭ^{fg}↓/ ‘has work performed on it’ (WKD ‘[being] worked [on]’).

Marks the theme of a verb whose agent assumes the WRK form.

- ◇ *úxí* /ŭ^{fg}↓č^hx^{fg}↓/ ‘is being manipulated in some fashion’ (MAN ‘manipulated’).

Marks the theme of a verb whose agent assumes the NWK form.

- ◇ Working verbs (WRK/WKD) vs lazy verbs (NWK/MAN).

Noun Markers Cont'd

◇ $tch\acute{a} + \acute{u}r\acute{u} \rightarrow tch\acute{a}r\acute{u}$ / $\widehat{ck}\widehat{\zeta}x\acute{e}^{\widehat{f}\widehat{g}}\downarrow\widehat{r}\widehat{u}^{\acute{x}\widehat{f}\widehat{g}}\downarrow$ /: reflexive form used with working verbs.

Noun Markers Cont'd

- ◇ $tch\acute{a} + \acute{u}r\acute{u} \rightarrow tch\acute{a}r\acute{u} / \widehat{ck}\widehat{\zeta}x^{f\acute{g}}_{\downarrow} \widehat{r}\widehat{R}\acute{u}^{f\acute{g}}_{\downarrow} /$: reflexive form used with working verbs.
- ◇ $dun + \acute{u}x\acute{í} \rightarrow dunx\acute{í} / \widehat{d}\acute{u}_{\downarrow} N' \widehat{\zeta}x^h I^{f\acute{g}}_{\downarrow} /$: reflexive form used with lazy verbs.

Noun Markers Cont'd

- ◇ $tch\acute{a} + \acute{u}r\acute{u} \rightarrow tch\acute{a}r\acute{u} / \widehat{ck}\widehat{\zeta}x^{f\acute{g}}\downarrow \widehat{r}\widehat{R}\acute{u}^{f\acute{g}}\downarrow /$: reflexive form used with working verbs.
- ◇ $dun + \acute{u}x\acute{i} \rightarrow dunx\acute{i} / \downarrow u\downarrow N^? \widehat{\zeta}X^h I^{f\acute{g}}\downarrow /$: reflexive form used with lazy verbs.
- ◇ $ta-$ / $\downarrow a\downarrow$ / (POSS): Possessive form.
E.g. $ta-n\acute{a}nr\acute{u} / \downarrow a\downarrow N^? \widehat{e}^{f\acute{g}}\downarrow N^? \widehat{r}\widehat{R}\acute{u}^{f\acute{g}}\downarrow /$ 'of the Elves'.

Compounds and Derivation

- ◇ Modifier is placed *second*.

cìxí ‘hall’ + *tún’q* ‘stone’ → *cìxítún’q* ‘stone hall’.

sán ‘being’ + *tá* ‘chimney’ → *Sántá* ‘The Chimney Man’.

Compounds and Derivation

- ◇ Modifier is placed *second*.

cìxí ‘hall’ + *tún’q* ‘stone’ → *cìxítún’q* ‘stone hall’.

sán ‘being’ + *tá* ‘chimney’ → *Sántá* ‘The Chimney Man’.

- ◇ Agent noun affix *-rú*:

sqtq ‘to learn’ → *sqtqrú* ‘teacher’.

nqn ‘Coal mine’ → *nqnrú* ‘Coal miner’.

Compounds and Derivation

- ◇ Modifier is placed *second*.

cìxí ‘hall’ + *tún’á* ‘stone’ → *cìxítún’á* ‘stone hall’.

sán ‘being’ + *tá* ‘chimney’ → *Sántá* ‘The Chimney Man’.

- ◇ Agent noun affix *-rú*:

sqtá ‘to learn’ → *sqtárú* ‘teacher’.

nán ‘Coal mine’ → *nánrú* ‘Coal miner’.

- ◇ Vowel swapping converts noun $\Leftrightarrow$ verb (disyllabic words only).

nánrú ‘Coal miner’ $\Leftrightarrow$ *núnrá* ‘to mine Coal’.

shúnq ‘retirement’ $\Leftrightarrow$ *shqnú* ‘to retire’.

- ◇ Precede the noun they qualify.
- ◇ *Standalone adjective phrase* (SAP).
- ◇ SAPs largely replace pronouns.
- ◇ SAP = *invoice particle* + adjective.

Adjectives: SAPs

- ◇ Precede the noun they qualify.
- ◇ *Standalone adjective phrase* (SAP).
- ◇ SAPs largely replace pronouns.
- ◇ SAP = *invariable particle* + adjective.
- ◇ E.g. *txúdí txõncũ* ‘Fat Txõncũ’
→ Possible SAP: *sí txúdí* ‘the fat one’

SAPs: Invoice

- ◇ Noun-clause agreement.

SAPs: Invoice

- ◇ Noun-clause agreement.
- ◇ Each noun is assigned a syntactic tense based on its initial phoneme.

SAPs: Invoice

- ◇ Noun-clause agreement.
- ◇ Each noun is assigned a syntactic tense based on its initial phoneme.
- ◇ And each syntactic tense is assigned a value $v \in \{1, 2, 3, 4, 5\}$:

Tense	v	Phonemes
Awake	1	$d, tx, x, ts, í$
REM	2	n, t, s, ch, o
Non-REM 1	3	$sh, ', r, u$
Non-REM 2	4	c, g, tsh, tch
Non-REM 3	5	(all vowels other than $u, í, o$)

SAPs: Invoice Particles

- ◇ Five invoice particles with a value $v \in \{-2, -1, 0, 1, 2\}$:

v	Particle
-2	$cúr$
-1	so
0	$túr$
1	$sí$
2	$árxí$

SAPs: Invoice Particles

- ◇ Five invoice particles with a value $v \in \{-2, -1, 0, 1, 2\}$:

v	Particle
-2	<i>cúr</i>
-1	<i>so</i>
0	<i>túr</i>
1	<i>sí</i>
2	<i>árxí</i>

- ◇ Invoice particle adjusts the tense of the noun.

SAPs: Determining the Invoice Particle

- ◇ Compute the tense difference d between the noun and the clause:

$$d := T(C) - T(N)$$

where $T(C)$ is the syntactic tense of the clause and $T(N)$ the tense of the noun.

SAPs: Determining the Invoice Particle

- ◇ Compute the tense difference d between the noun and the clause:

$$d := T(C) - T(N)$$

where $T(C)$ is the syntactic tense of the clause and $T(N)$ the tense of the noun.

- ◇ The value v of the invoice particle is then given by:

$$v := \begin{cases} d, & \text{if } |d| < 3 \\ -\text{sgn}(d) \cdot (5 - |d|), & \text{otherwise.} \end{cases}$$

SAPs: Example 1

Given *txúdí txɔncu* in a sentence in the REM Sleep Tense:

$$d = T(\text{REM}) - T(txɔncu) = 2 - 1 = 1$$

The first case is taken, yielding

$$v = d = 1$$

and thus, the appropriate SAP is *sí txúdí*.

SAPs: Example 2

Alternatively, in a sentence in the Non-REM Phase 2 Tense:

$$d = T(\text{NR2}) - T(tx\acute{o}ncy) = 4 - 1 = 3$$

The second case applies, yielding

$$v = -\text{sgn}(3) \cdot (5 - |3|) = -1 \cdot 2 = -2$$

and thus, the appropriate SAP is *cúr txúdí*.

SAPs: Extraposition

- ◇ Used to ensure a clause or phrase observes proper work order.

SAPs: Extraposition

- ◇ Used to ensure a clause or phrase observes proper work order.
- ◇ E.g. 'three ferrules for the Master Carbonators under the mine'.

SAPs: Extraposition

- ◇ Used to ensure a clause or phrase observes proper work order.
- ◇ E.g. ‘three ferrules for the Master Carbonators under the mine’.
- ◇ Word-by word translation is ill-formed:

***ún xúsưrợngi tsírq nặn tchủ’i ta-rựtí.**

<i>ún</i>	<i>xúsưrợngi</i>	<i>tsírq</i>	<i>nặn</i>	<i>tchủ’i</i>	<i>ta-rựtí</i>
ũ↓N’	⌈x ^h ũ↓sư ^{fḡ} ↓r ₊ ^{k†fḡ} N’jḡi↓	t̩sɪ↓r ₊ ^{k†fḡ}	N’ [?] e ^{fḡ} ↓N’	ck⌈xũ ^{fḡ} ↓?i↓	t̩a↓r ₊ ^{fḡ} ũ↓t̩ɪ↓
for	Master Carbonator	under	mine	three	POSS-ferrule

(ungrammatical)

nặn ‘mine’ → work order 6

rựtí ‘ferrule’ → work order 4

SAPs: Extraposition

- ◇ Moving the PP is grammatical, but changes the meaning:

ún xúsưrɔŋgi tchú'i ta-rưtí tsíɔ nán.

<i>ún</i>	<i>xúsưrɔŋgi</i>	<i>tchú'i</i>	<i>ta-rưtí</i>	<i>tsíɔ</i>	<i>nán</i>
ũ↓N'	çX ^h ũ↓sư ^{fɔ̌} ↓rư ^{kɛ̌fɔ̌} N'jgi↓	ckçxũ ^{fɔ̌} ↓ʔi↓	ta↓rư ^{fɔ̌} ↓ti↓	tɕi↓rư ^{kɛ̌fɔ̌}	N'e ^{fɔ̌} ↓N'
for	Master Carbonator	three	POSS-ferrule	under	mine

‘three ferrules under the mine for the Master Carbonators’

- ◇ Now the ferrules, and not the Master Carbonators, are under the mine!

SAPs: Extraposition

◇ Solution: Extraposition.

SAPs: Extraposition

- ◇ Solution: Extraposition.
- ◇ Replace *nqn* with a *SAP* and move it to the end.

SAPs: Extraposition

- ◇ Solution: Extraposition.
- ◇ Replace *nán* with a SAP and move it to the end.
- ◇ Since there is no adjective qualifying *nán*, the ‘null adjective’ *xún* is used.

SAPs: Extraposition

- ◇ Solution: Extraposition.
- ◇ Replace *nq̃n* with a **SAP** and move it to the end.
- ◇ Since there is no adjective qualifying *nq̃n*, the ‘null adjective’ *xún* is used.

ún xúsựṛọngi tsị́ṛọ tụ́r xún tchụ́'i ta-ṛụ̣tí ṇaṇ.

‘three ferrules for the Master Carbonators under the mine’

Pronouns

Demonstrative Pronouns

- ◇ Deixis is relative.

Demonstrative Pronouns

- ◇ Deixis is relative.
- ◇ One demonstrative pronoun for each *syntactic* tense.

Demonstrative Pronouns

- ◇ Deixis is relative.
- ◇ One demonstrative pronoun for each *syntactic* tense.
- ◇ Proximal = syntactic Present Tense.

Demonstrative Pronouns

- ◇ Deixis is relative.
- ◇ One demonstrative pronoun for each *syntactic* tense.
- ◇ Proximal = syntactic Present Tense.
- ◇ Medial = syntactic Future Tense.

Demonstrative Pronouns

- ◇ Deixis is relative.
- ◇ One demonstrative pronoun for each *syntactic* tense.
- ◇ Proximal = syntactic Present Tense.
- ◇ Medial = syntactic Future Tense.
- ◇ Distal = syntactic Future-in-the-Future Tense.

Demonstrative Pronouns

◇ *chír* + Tense Marker:

Tense	Demonstrative
AWK	<i>chírsq̃n</i>
REM	<i>chírnu</i>
NR1	<i>chírtxí</i>
NR2	<i>chíro</i>
NR3	<i>chírnu</i>

Demonstrative Pronouns

◇ *chír* + Tense Marker:

Tense	Demonstrative
AWK	<i>chírsq̃n</i>
REM	<i>chírnu</i>
NR1	<i>chírtxí</i>
NR2	<i>chíro</i>
NR3	<i>chírnu</i>

◇ In a REM clause: proximal = *chírnu*, medial = *chírtxí*, distal = *chíro*.

Demonstrative Pronouns

◇ *chír* + Tense Marker:

Tense	Demonstrative
AWK	<i>chírsq̃n</i>
REM	<i>chírnu</i>
NR1	<i>chírtxí</i>
NR2	<i>chíro</i>
NR3	<i>chírnu</i>

◇ In a REM clause: proximal = *chírnu*, medial = *chírtxí*, distal = *chíro*.

◇ In a NR2 clause: proximal = *chíro*, medial = *chírnu*, distal = *chírsq̃n*.

Demonstrative Pronouns

◇ *chír* + Tense Marker:

Tense	Demonstrative
AWK	<i>chírsq̃n</i>
REM	<i>chírnu</i>
NR1	<i>chírtxí</i>
NR2	<i>chíro</i>
NR3	<i>chírnụ</i>

- ◇ In a REM clause: proximal = *chírnu*, medial = *chírtxí*, distal = *chíro*.
- ◇ In a NR2 clause: proximal = *chíro*, medial = *chírnụ*, distal = *chírsq̃n*.
- ◇ In reported speech, the direction is reversed.

Demonstrative Pronouns: Example

- ◇ Consider a sentence with NR1 as the syntactic tense.

Demonstrative Pronouns: Example

- ◇ Consider a sentence with NR1 as the syntactic tense.
- ◇ The medial demonstrative would be *chíro* (i.e. the NR2 form).

Demonstrative Pronouns: Example

- ◇ Consider a sentence with NR1 as the syntactic tense.
- ◇ The medial demonstrative would be *chíro* (i.e. the NR2 form).
- ◇ Assume the sentence is paraphrased using the AWK tense.

Demonstrative Pronouns: Example

- ◇ Consider a sentence with NR1 as the syntactic tense.
- ◇ The medial demonstrative would be *chíro* (i.e. the NR2 form).
- ◇ Assume the sentence is paraphrased using the AWK tense.
- ◇ The medial pronoun would then be *chírny* (i.e. the NR3 form).

Personal Pronouns

- ◇ Three kinds of personal pronouns.

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.
- ◇ proximal = 1st person, medial = 2nd person, distal = 3rd person.

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.
- ◇ proximal = 1st person, medial = 2nd person, distal = 3rd person.
- ◇ E.g. *chíro xúsưrɔŋgi* ‘I’ (in a NR2 sentence spoken by a Master Carbonator).

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.
- ◇ proximal = 1st person, medial = 2nd person, distal = 3rd person.
- ◇ E.g. *chíro xúsưrɔŋgi* ‘I’ (in a NR2 sentence spoken by a Master Carbonator).
- ◇ E.g. *chírtxí isirɔŋgi* ‘it’ (in a NR3 sentence in reference to Collier).

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.
- ◇ proximal = 1st person, medial = 2nd person, distal = 3rd person.
- ◇ E.g. *chíro xúsưrɔŋgi* ‘I’ (in a NR2 sentence spoken by a Master Carbonator).
- ◇ E.g. *chírtxí isirɔŋgi* ‘it’ (in a NR3 sentence in reference to Collier).
- ◇ *high-class pronouns* = demonstrative + *rɔŋgi* ‘cloak’.

Personal Pronouns

- ◇ Three kinds of personal pronouns.
- ◇ *full personal pronouns* = demonstrative + ‘Elf’.
- ◇ proximal = 1st person, medial = 2nd person, distal = 3rd person.
- ◇ E.g. *chíro xúsưrɔŋgi* ‘I’ (in a NR2 sentence spoken by a Master Carbonator).
- ◇ E.g. *chírtxí isirɔŋgi* ‘it’ (in a NR3 sentence in reference to Collier).
- ◇ *high-class pronouns* = demonstrative + *rɔŋgi* ‘cloak’.
- ◇ *low-class pronouns* are identical to the demonstratives.

Personal Pronouns: Rules

- ◇ Full pronouns when speaking (or in reference) to a higher-class Elf.

Personal Pronouns: Rules

- ◇ Full pronouns when speaking (or in reference) to a higher-class Elf.
- ◇ Abridged pronouns when speaking (or in reference) to an equal/lower-status Elf.

Personal Pronouns: Rules

- ◇ Full pronouns when speaking (or in reference) to a higher-class Elf.
- ◇ Abridged pronouns when speaking (or in reference) to an equal/lower-status Elf.
- ◇ Not used in reference to The Chimney Man or The Grand Carbonator.

Personal Pronouns: Rules

- ◇ Full pronouns when speaking (or in reference) to a higher-class Elf.
- ◇ Abridged pronouns when speaking (or in reference) to an equal/lower-status Elf.
- ◇ Not used in reference to The Chimney Man or The Grand Carbonator.
- ◇ Pronouns only refer to Elves; SAPs are used with other referents.

Evidentiality

◇ *sán* (VER ‘veridical’): (as though) decreed by The Chimney Man (truth).

Evidentiality

- ◇ *sán* (VER ‘veridical’): (as though) decreed by The Chimney Man (truth).
- ◇ *gan* (OBS ‘observable’): directly observable or deduced via reasoning.

Evidentiality

- ◇ *sán* (VER ‘veridical’): (as though) decreed by The Chimney Man (truth).
- ◇ *gan* (OBS ‘observable’): directly observable or deduced via reasoning.
- ◇ *xìn* (COM ‘communicated’): communicated by someone (hearsay).

Evidentiality

- ◇ *sán* (VER ‘veridical’): (as though) decreed by The Chimney Man (truth).
- ◇ *gan* (OBS ‘observable’): directly observable or deduced via reasoning.
- ◇ *xìn* (COM ‘communicated’): communicated by someone (hearsay).
- ◇ *txá* (NOR ‘North Pole’): purported to exist (in the North Pole).

Evidentiality

- ◇ *sán* (VER ‘veridical’): (as though) decreed by The Chimney Man (truth).
- ◇ *gan* (OBS ‘observable’): directly observable or deduced via reasoning.
- ◇ *xìn* (COM ‘communicated’): communicated by someone (hearsay).
- ◇ *txá* (NOR ‘North Pole’): purported to exist (in the North Pole).
- ◇ *tsún* (DUB ‘dubious’): purported to exist elsewhere.

Aspect

- ◇ Working verbs are marked for *telicity*, i.e. whether the work is done,
 - ◇ Telic is the default.
 - ◇ *tú* (ATEL): marks that a working verb is atelic.

Aspect

- ◇ Working verbs are marked for *telicity*, i.e. whether the work is done,
 - ◇ Telic is the default.
 - ◇ *tú* (ATEL): marks that a working verb is atelic.
- ◇ Lazy verbs are marked for whether the laziness is continued or returning.
 - ◇ Continuous is the default.
 - ◇ *dor* (HAB): marks that a lazy verb is habitual.

Aspect

- ◇ Working verbs are marked for *telicity*, i.e. whether the work is done,
 - ◇ Telic is the default.
 - ◇ *tú* (ATEL): marks that a working verb is atelic.
- ◇ Lazy verbs are marked for whether the laziness is continued or returning.
 - ◇ Continuous is the default.
 - ◇ *dor* (HAB): marks that a lazy verb is habitual.
- ◇ Aspect markers directly precede the verb.

Elision and (Zero) Copula

- ◇ Repeated verb markers may be elided.
- ◇ The Elvish copula is $\emptyset$, i.e. verb *markers* are present, but there is no root.
- ◇ Combined with elision, this can yield a zero copula.

Numbers

- ◇ Elvish numbers are translated verbatim from Santaa.
- ◇ E.g. *irtōtōtōn* ‘7’ (lit. ‘build more more more’) from Santaa *hō^x hō^ŷ hō^ŷ hō^ŷ*.

Appearance and Culture

Elvish Upper Class

- ◇ Consists of Colliers and Master Carbonators.

Elvish Upper Class

- ◇ Consists of Colliers and Master Carbonators.
- ◇ Only they may wear *rōngi* / $\widehat{\underline{r}}\widehat{\mathbb{R}}^{\mathbf{k}\dagger\widehat{\mathfrak{g}}}\mathbf{N}^{\mathfrak{?}}\widehat{\mathfrak{g}}\mathbf{i}\downarrow$ / ‘cloaks’.

Elvish Upper Class

- ◇ Consists of Colliers and Master Carbonators.
- ◇ Only they may wear *rōngi* / $\widehat{\underline{r}}\widehat{\underline{R}}^{k\ddagger f\hat{g}}N^?j\widehat{g}i\downarrow$ / ‘cloaks’.
- ◇ *isirōngi* / $i\downarrow s_{\text{᠑}}i\downarrow \widehat{\underline{r}}\widehat{\underline{R}}^{k\ddagger f\hat{g}}N^?j\widehat{g}i\downarrow$ / ‘Collier’ (lit. ‘redcloak’).

Elvish Upper Class

- ◇ Consists of Colliers and Master Carbonators.
- ◇ Only they may wear *rōngi* / $\widehat{\underline{r}}\widehat{\underline{R}}^{k\ddagger f\grave{g}}N^?j\widehat{g}i\downarrow$ / ‘cloaks’.

- ◇ Only upper-class Elves wear clothes.
- ◇ A lower-class Elf relies on its ventral furnace for warmth instead.
- ◇ *ishúróngi* /i↓s̥^hũ↓r̥ṛ^{k†fǵ}Nʔjǵi↓/ ‘fake cloaks’ (lit. ‘charcoal¹ cloaks’).

¹ In Elvish, the word for ‘charcoal’ is commonly used to mean ‘fake’ or ‘imitation’.

‘Retirement’

- ◇ An Elf ‘retires’ at the moment of its death.

‘Retirement’

- ◇ An Elf ‘retires’ at the moment of its death.
- ◇ Some Elves may be ‘decommissioned’ ahead of time.

‘Retirement’

- ◇ An Elf ‘retires’ at the moment of its death.
- ◇ Some Elves may be ‘decommissioned’ ahead of time.
- ◇ *Shonxqshúnq* /ʃ^{hk}†^{fġ}Nʔç^hx^a^{fġ}↓ʃ^hũ^{fġ}↓Nʔa^{fġ}↓/ ‘Coal burial’.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.
- ◇ E.g. a canary may be refurbished into a head miner.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.
- ◇ E.g. a canary may be refurbished into a head miner.
- ◇ Cloaked classes receive a cloak that is sewn onto the Elf.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.
- ◇ E.g. a canary may be refurbished into a head miner.
- ◇ Cloaked classes receive a cloak that is sewn onto the Elf.
- ◇ Candidates are selected by Colliers or the next higher class.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.
- ◇ E.g. a canary may be refurbished into a head miner.
- ◇ Cloaked classes receive a cloak that is sewn onto the Elf.
- ◇ Candidates are selected by Colliers or the next higher class.
- ◇ The Grand Carbonator is always a new Elf constructed by The Chimney Man.

Refurbishment

- ◇ The act of promoting an Elf to a higher social class.
- ◇ E.g. a canary may be refurbished into a head miner.
- ◇ Cloaked classes receive a cloak that is sewn onto the Elf.
- ◇ Candidates are selected by Colliers or the next higher class.
- ◇ The Grand Carbonator is always a new Elf constructed by The Chimney Man.
- ◇ Elves that fall below their social class are immediately decomissioned.
